KT-PIR1

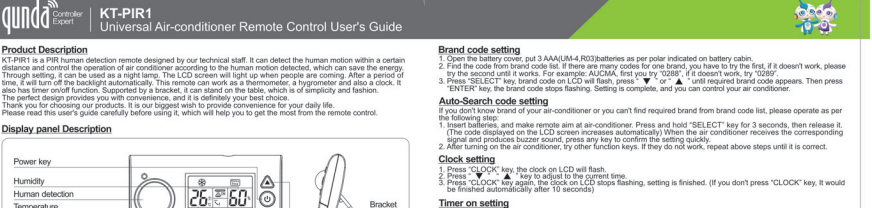
Universal Air-conditioner Remote Control User's Guide

Product Description

KT-PIR1 is a PIR human detection remote designed by our technical staff. It can detect the human motion within a certain distance and control the operation of air conditioner according to the human motion detected, which can save the energy. Through setting, it can be used as a night lamp. The LCD screen will light up when people are coming. After a period of time, it will turn off the backlight automatically. This remote can work as a thermometer, a hygrometer and also a clock. It also has timer on/off function. Supported by a bracket, it can stand on the table, which is of simplicity and fashion.
The perfect design provides you with convenience, and it is definitely your best choice.
Thank you for choosing our products. It is our biggest wish to provide convenience for your daily life.
Please read this user's guide carefully before using it, which will help you to get the most from the remote control.

Display panel Description



PIR human detection setting

1. Press the "PIR" key, the LCD screen will display "Delay stop", and PIR Delay stop function starts. After starting the PIR mode, the air conditioner would turn off automatically where there is no human motion detected in half an hour.
2. Press the "PIR" key again, the LCD screen will display "Eco", the PIR Eco function will start. In cooling mode, if no human motion is detected in 15 minutes, the setting temperature will raise 1°C.If no human motion is detected in 30 minutes, the setting temperature will raise 2°C. With human motion detected, the temperature would return to setting temperature. In heating mode, if no human motion is detected in 15 minutes, the setting temperature will decrease 1°C. If no human motion is detected in 30 minutes, the setting temperature will decrease 2°C. With human motion detected, the temperature would return to setting temperature.
3. Press the "PIR" key again to exist the PIR mode.

Night lamp setting

1. Turn on the night lamp: press "Mode" key and "Enter" key simultaneously, you can see " " displays on the LCD. The night lamp function is on.
2. Turn off the night lamp: press "Mode" key and "Enter" key simultaneously and " " disappears. The night lamp function is off.
   It is convenient when you start the lamp function at night. The lamp will turn on when human motion is detected. It will turn off in 15 seconds when you go to bed or go away, which is convenient and energy-saving.

Brand code setting

1. Open the battery cover, put 3 AAA(UM-4,R03)batteries as per polar indicated on battery cabin.
2. Find the code from brand code list. If there are many codes for one brand, you have to try the first, if it doesn't work, please try the second until it works. For example: AUCMA, first you try "0288", if it doesn't work, try "0289".
3. Press "SELECT" key, brand code on LCD will flash, press " ▼ " or " ▲ " until required brand code appears. Then press "ENTER" key, the brand code stops flashing. Setting is complete, and you can control your air conditioner.

Auto-Search code setting

If you don't know brand of your air-conditioner or you can't find required brand from brand code list, please operate as per the following step:

1. Insert batteries, and make remote aim at air-conditioner. Press and hold "SELECT" key for 3 seconds, then release it. (The code displayed on the LCD screen increases automatically) When the air conditioner receives the corresponding signal and produces buzzer sound, press any key to confirm the setting quickly.
2. After turning on the air conditioner, try other function keys. If they do not work, repeat above steps until it is correct.

Clock setting

1. Press "CLOCK" key, the clock on LCD will flash.
2. Press " ▼ " or " ▲ " key to adjust to the current time.
3. Press "CLOCK" key again, the clock on LCD stops flashing, setting is finished. (If you don't press "CLOCK" key, It would be finished automatically after 10 seconds)

Timer on setting

you can set timer on only after turning off your air conditioner.

1. Press the "TIMER" key, the clock signal " ON:0 "on LCD appears and time flashes.
2. Press " ▼ " or " ▲ ", adjust to the time you want to turn on the air conditioner.
3. Time stops flashing after 10 seconds. The LCD displays current time and timer signal " ON:0 ". Now setting is finished.

Timer off setting

you can set timer off only after turning on your air conditioner.

1. Press the "TIMER" key, the clock signal " OFF:0 "on LCD appears and time flashes.
2. Press " ▼ " or " ▲ ", adjust to the time you want to turn off the air conditioner.
3. Time stops flashing after 10 seconds. The LCD displays current time and timer signal " OFF:0 ". Then setting is finished.

Marks: 1) The time range that you can set is 00-24 hours.
2) Press "TIMER" twice in succession, the timer on/ off function is canceled.
3) Press "TIMER" key to check the time of timer on the LCD. After 5 seconds, it will return to display the current time.
4) After the timer setting finishes, ensure the remote aiming at the air conditioner and within effective distance. Otherwise the setting is invalid.

Attention

1. The valid distance of PIR human detection is about 8 meters, and the effective distance can be greatly influenced by the external factors. Such as: the temperature, detection angle and obstructions, etc. So you need to pay attention to these factors when using.
2. If the remote is not used for a long time, remove the battery so as to avoid leakage liquid of the battery damaging the machine. When the LCD looks dim, please change batteries. (New and old batteries can not be used together).
3. Usually, the LCD displays the current time. Press "ENTER" key to check the selected code on the LCD. After 5 seconds, it returns to display the current time.
4. If the timer on/off doesn't work, please check carefully to see if there is obstacle between the remote and air conditioner. Because the operation is effective only when the air conditioner receives the timer on/off signal from remote controller.
5. The manufacturer keeps the right to change the parameter and function of product.

Technical Parameters

Controllable distance: Larger than 8 meters
The voltage: DC4.5V
Battery model: Battery AAA(UM-4, R03)×3
Dimension: L111.5mm×W74.4mm×D22mm(without the lens)
Weight: ApproX80g(without batteries)
