## INDOOR DETECTORS IMMUNE TO ANIMALS UP TO 25KG

The Xline series volumetric motion detectors are also available in a Pet Immune version. These pet immune motion detectors disregard motion caused by animals weighing up to 25Kg, they provide an 80° detection angle and are housed in the same plastic casings as the respective standard Xline detectors.

### XIRP100H, XIRP200H

XIRP100H and XIRP200H are passive infrared detectors that use a dual pyroelectric element capable of detecting infrared radiation.

XDTP200HM, XTP200H

### XDTP200H, XDTP200HM

The dual technology detectors from the Xline series combine infrared and microwave detection using a dual element PIR and a X band microwave element.

### XTTP200H

The XTTP200H combines two dual element PIR and a X band microwave element. It operates as a dual technology detector but is capable of processing three types of input signals. It provides two operating modes, standard and digital.
